

Logo / graphic designs / brand identity

#GPT4 Prompt for brain storming and guidelines, remember to attach logos:

I have a newly started company called arcxit.ai

Im a student and i study a bachelor in It-achitecture which is why i want my buisness to have the name, something along the lines of achitecture x information techonology and then with the .ai because i have to help small to mid size buisness implement ai and automation.

Can you please draft me some branding and identify for my buisness?

I want to have some kind of holistic perspective on thing and attached is my logos and art i have created so far. The company slogan right now is: online solutions based on human understanding. These are my colors:

#001524 - very dark blue (text)

#1d635c - dark green

#288A81 - green

#34b2a6 - light green
